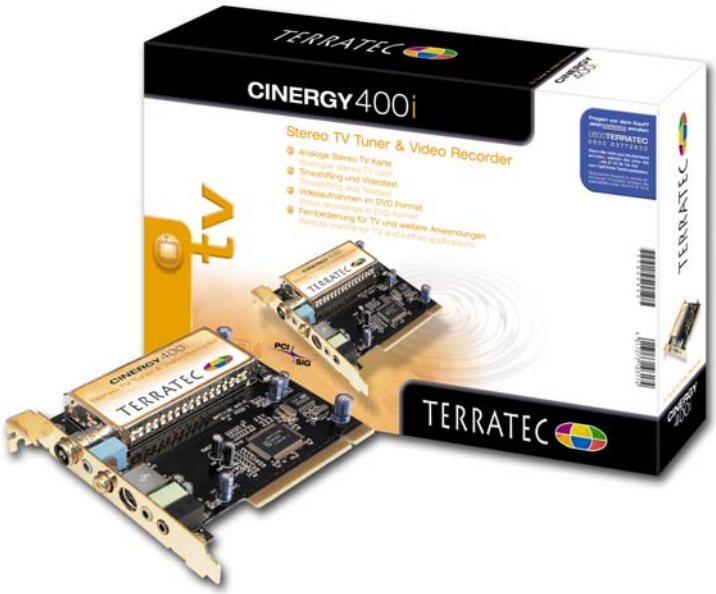
CINERGY 400i

Experience TV entertainment on the PC like never before!



Treat yourself to crystal clear, flicker-free image quality, real stereo sound, and the utmost in convenience, thanks to the included remote control.
The station search guides you through all available channels and identifies them automatically. The multi-station preview provides images of all stations at a glance while you can easily scale the image size up to the full screen yourself.
Capture single images, video clips or a complete evening TV program directly onto your hard disk! TerraTec Cinergy supports nearly all current audio/video codecs such as DivX.
Timer-controlled recordings in VCD, SVCD or DVD are child's play with the accompanying video recorder software WinDVR.
With your personal TV magazine on the Internet you gain a quick and convenient overview of the program. But you can obtain brand-new information about the program even without the Internet: using integrated high-speed video text with page buffer, you can browse through the supplemental program and immediately obtain free information!
Easily control all TerraTec Cinergy functions from the couch with the remote control! It is freely and easily programmable and, in addition, can control almost every Windows software! In addition to antennas, cable networks or satellite receivers, the Cinergy can also be used with camcorders or DVD players.
With TerraTec's Cinergy 400i, you experience TV entertainment on the PC like never before!
